Product description.

This product is a two-component epoxy adhesive for repairing and regenerating cracked surfaces in natural stones and concrete. The low viscosity of this adhesive causes rapid penetration into cracks and small pores in the stone and concrete surfaces. Thinness, strength Yellowing, and excellent mechanical properties of this product have been welcomed and used in stone cutting factories for reinforcement with fiberglass mesh behind the stone slabs and filling the pores in the surface of the slabs, this product after complete cooking It is completely resistant to water, ice and weather conditions.

Product properties

-) Completely transparent
-) Low viscosity and permeable to the surface
-) Curable at ambient temperature
-) Resistance to moisture, water and chemicals
-) Excellent adhesion
-) High resistance to temperature shocks
-) High resistance at temperatures below zero degrees
-) Good resistance to yellowing by sunlight
-) Very long life

Mixing procedure

Measure at 5 volumes of part A and 1 volumes of part B

Product specification	Resin	hardener
Appearance	clear liquid	clear liquid
Mixed viscosity at 25 c	400-600 cps.	
Specific gravity	1.1	
Pot life at 25 c (100gr)	40 min

Cure time

-) - hours at 5 c
-) - hours at 15 c
-) 168 hours at 25 c
-) 48 hours at 35 c

Tack-free time(thin film initial cure)

-) - hours at 15 c
-) 96 hours at 25 c
-) 48 hours at 35 c

Typical Physical Properties

Property	value	test method
tensile strength	40 mpa	ASTM D638
tensile shear strength steel/steel	13 mpa	ASTM D1002
compressive strength	80 mpa	ASTM D695
flexural strength	40 mpa	ASTM D790
